CONTENTS OF VOLUME VI.

NUMBER XVI.

Page.

ART. I. Notes and Remarks connected with Meteorology on Lake Superior, and on the variations in its level by barometric causes, and variations in the season; by Prof. WM. W. MATHER, - 1

II. Contributions to the Geology of Texas; by Dr. FERDINAND RŒMER, - - - - - - - - - - 21

III. On the Orbits of the Asteroids; by B. A. GOULD, Jr., A.A.S., 28

IV. Continuation of the List of Localities of Algæ in the United States; by Prof. J. W. BAILEY,—with Directions for Collecting and Preserving Algæ, by Dr. WM. H. HARVEY, - - 37

V. Objections to the Theories severally of Franklin, Dufay and Ampère, with an Effort to Explain Electrical Phenomena by Statical or Undulatory Polarization; by Prof. ROBERT HARE, M.D., - - - - - - - - - - 45

VI. Upon a peculiar kind of Isomorphism that plays an important part in the Mineral Kingdom; by Professor SCHEERER, - 57

VII. On the Construction of Blast-furnaces for the Smelting of Iron with Anthracite; by S. S. HALDEMAN, - - - - 74

VIII. Notes on some Ferns of the United States; by Professor KUNZE of Leipzic, 1846.—(Communicated by Dr. G. ENGELMANN,) - - - - - - - - - 80

IX. On the Beneficent Distribution of the Sense of Pain; by Mr. G. R. ROWELL, - - - - - - - - - 89

X. On the Absorption of Carbonic Acid Gas by Liquids; by Prof. W. B. ROGERS, and Prof. R. E. ROGERS, - - - - 96

XI. Oxydation of the Diamond in the Liquid Way; by Prof. R. E. ROGERS and Prof. W. B. ROGERS, - - - - - 110

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Researches on the Latent and Specific Heat of Bodies, by C. C. PERSON, 111.—Note on the means of testing the comparative value of Astringent Substances for the purpose of Tanning, by ROBERT WARINGTON, Esq., 112.—On the Manufacture of pure Sulphuric Acid, by AUG. A. HAYES, M.D., 113.

Mineralogy and Geology.—On the Wave of Translation in connexion with the Northern Drift, by W. WHEWELL, D.D., F.G.S., 115.—On the Slow Ttransmission of Heat through loosely coherent Clay and Sand, by JAMES NASMYTH, Esq., 119.—On the Changes of the Vegetable Kingdom in the different Geological Epochs, by M. ADOLPHE BRONGNIART, 120.—Geology and Topography of the Isthmus of Panama, by EVAN HOPKINS, C.E., F.G.S., 123.—Geology and Mineralogy of the Malay Peninsula, 129.—On an Impression of the Soft Parts of an Orthoceras, 132.—Effect of Fusion on the Density of Rocks: Talus Slopes, 133.—Burra Burra Copper Mine, South Australia: Histoire des Progrès de la Géologie de 1834 à 1845, par LE VICOMTE D'ARCHIAC, 134.

Botany and Zoology.—Gutta Percha, 135.—On the Eyes of the Balanus, by Dr. LEIDY: A comparison between Sterna Cantiaca, Gm., of Europe, and Sterna acuflavida, nobis, hitherto considered identical with S. Cantiaca, and a description, of a new species of Wren, by Dr. CABOT, 136.—Notice of a fractured and repaired Argonauta argo, by Prof. C. B. ADAMS, 137.—Description of a species of Haliotis, by Prof. C. B. ADAMS, 138.

Astronomy.—Lord Rosse's Telescope, 139.—New Planet: Supposed new Star: On the opinion of Copernicus with respect to the Light of the Planets, by Prof. DE MORGAN, 140: Solar Parallax, 143.

Miscellaneous Intelligence.—Memoire sur les Temperatures de la Mer Glaciale à la surface, à de grandes profondeurs, et dans le voisinage des Glaciers du Spitzberg; par CH. MARTINS, 143.—Indurating Building Materials, 145.—Coal in Chili: Metallurgical Industry of Bohemia: On the Jordan and Dead Sea, by the late Lieut. MOLYNEUX, 146.—Level of the Caspian and Dead Seas: Cremastochilus in Ant Nests, by S. S. HALDEMAN: Meteor, by D. D. PHARES, A.M.: Common salt, 148.—Geological Map from Soundings: Science at Cambridge: Expedition in search of Sir John Franklin, 149.

Bibliography.—Researches on the Chemistry of Food and the motion of the juices in the animal body, by JUSTUS LIEBIG, M.D.: Carices Americæ Septentrionalis Exsiccatæ, edidit H. P. SARTWELL, M.D., 149.—Statistics of Coal, by RICHARD COWLING TAYLOR, F.G.S.L., etc., 150.—Indicis Generum Malacozoorum Primordia, etc. conscripsit A. N. HERRMANNSEN: Principles of Zoology, touching the Structure, Development, Distribution and Natural arrangement of the races of Animals, living and extinct, with numerous illustrations, by LOUIS AGASSIZ and AUGUSTUS A. GOULD, 151.—Observations on the Temple of Serapis at Pozzuoli near Naples, by CHARLES BABBAGE, 152.—Elements of Natural Philosophy; being an Experimental Introduction to the Study of the Physical Sciences, by GOLDING BIRD, A.M., M.D., F.R.S., F.L.S., &c. &c., 153.—An Introduction to the study of Meteorology, by DAVID P. THOMSON, M.D.: Naturwissenschaftliche Abhandlungen, von WILHELM HAIDINGER, 154.—Berichte über die Mittheilungen von Freunden der Naturwissenschaften in Wien, 155.

List of Works, 155.

NUMBER XVII.

Page.

ART. XII. On the Indian Archipelago, ... 157

XIII. On the Anomalies presented in the Atomic Volume of Sulphur and Nitrogen; with remarks on Chemical Classification, and a notice of M. Laurent's Theory of Binary Molecules; by T. S. HUNT, ... 170

XIV. Upon the Influence of Color on Dew; by Prof. JOHN BROCKLESBY, ... 178

XV. A new Method of extracting Pure Gold from Alloys and from Ores; by C. T. JACKSON, U.S.G.S., ... 187

XVI. Discovery of Tellurium in Virginia; by C. T. JACKSON, U.S.G.S., ... 188

XVII. Upon a peculiar kind of Isomorphism that plays an important part in the Mineral Kingdom; by Professor SCHEERER, 189

XVIII. English Prefixes derived from the Greek; by Professor J. W. GIBBS, ... 206

XIX. On a New empirical Formula for ascertaining the Tension of Vapor of Water at any Temperature; by J. H. ALEXANDER, Esq., ... 210

XX. Observations on some New England Plants, with characters of several new species; by EDWARD TUCKERMAN, A.M., 224

Page.

XXI. Descriptions of Shells found in Connecticut, collected and named by the late Rev. J. H. Linsley; by AUGUSTUS A. GOULD, M.D., - - - - - - - - - 233

XXII. Results of Analytical Researches in the Neptunian Theory of Uranus; by ENOCH F. BURR, - - - - - - 236

XXIII. Caricography; by Prof. DEWEY, - - - - - 244

XXIV. On Guita Percha; by EDWARD N. KENT, - - - - 246

XXV. On Emerald Nickel from Texas, Lancaster County, Pa.; by Prof. B. SILLIMAN, Jr., - - - - - - - - 248

XXVI. On new Minerals from Texas, Lancaster Co., Penn.; by CHARLES UPHAM SHEPARD, M.D., - - - - - - 249

XXVII. An Account of a Meteorite of Castine, Maine, May 20, 1848; by CHARLES UPHAM SHEPARD, M.D., - - - - 251

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Ice, a Conductor of Galvanism: Grove's Battery with only Water used for the Zinc cup, 253.—Oxyd of Zinc in the Porous cup: Selenium: Cause of Irised Colors on Minerals, 254.—On the Radiating Power of Substances, by A. MASSON and L. COURTÉPÉE: On Auriferous Glass, by H. ROSE: Dimorphism of Zinc, 255.—On the Estimation of Urea—Presence of Urea in the Vitreous Humor of the Eye, by M. E. MILLON: On the Employment of Gun-cotton in Mining, by M. COMBES: On a new Process for preparing Chloroform, by MM. HURATET and LAROCQUE, 256.—On the Crystallized Hydrated Oxyd of Zinc, by M. J. NICKLES, 257.—Electro-magnetic Balance for measuring the Intensity of Currents, by M. CH. MÈNE: On certain properties of Iodine, Phosphorus, Nitric Acid, &c., by M. NIÉPCE DE SAINT VICTOR, 258.—Note to a paper on the Chemical Nature of Gelatine, published in the American Journal of Jan, 1848, p. 74, by T. S. HUNT, 259.—Purifying Liquids by Galvanism: Decomposition of Substances by Steam, and Manufacture of Sulphate and Muriate of Potash, 260.

Mineralogy and Geology.—Samarskite, 266.—Bagrationite, a new mineral from the Urals, by M. DE KOSCHAROV: Pseudomorphism, 267.—On Dolomisation, by A. VON MORLOT, 268.—Three Minerals from the Lake Superior Copper Region, by J. D. WHITNEY, 269.—Mines of Cinnabar in Upper California, 270.—Argentiferous Galena and Iron Ore in Algeria, 271.—Emery in Asia Minor: Fossil Footprints, by DEXTER MARSH, 272.—Gold in Canada, 274.—Liebnerite—a new Mineral: Produce of Gold in the Ural and Siberia in the year 1846, 275.

Zoology.—Pancreatic secretion, 276.—Sponge, 277.

Astronomy.—Neptune, by SEARS C. WALKER, 277.—The tenth Asteroid, Diana: Shooting Stars of August 10, 1847, 278.—Shooting Stars of August 10, 1848, 279.

Miscellaneous Intelligence.—California, 280.—Verbal Communication from Dr. HARE, on the Rationale of the Explosion causing the Great Fire of 1845, at New York, 281.—Building Material, 285.—Types, 287.—Bullets: Quantity of the different Grains produced in the United States in 1847: Smithsonian Institution, 288.—Tenacity of Life in Black Ants, by DEXTER MARSH, 292.—Cabinet and Observatory at Amherst College, Mass: Bromine from the Bittern of Salt Works, by Messrs. ALLIS & GILLESPIE, 293.—Bosphorus: American Association for the Promotion of Science, 294.—Table of the periods when the Hudson River opened and closed at Albany, so far as the same can now be ascertained, 295.—Heat and Cold of Utica: Atmidoscope: Magnetic Perturbations, 296.—Gold Medal of the Royal Geographical Society of London: Beavers, by D. D. PHARES: F. Markoe's Mineralogical Cabinet: Meteorite of Arkansas, 297.—*Obituary.*—Death of J. Richardson, 297.

Bibliography.—De Bow's Commercial Review of the South and West: Annual Report of the Regents of the University of the State of New York: Letters on Geology, by David Christy, 298.—Boston Journal of Natural History: Elements of Meteorology, by Prof. Brocklesby: Lead Diseases, by S. L. Dana, 299.—Genera Illustrata:—Illustrated Genera of American Plants, by Asa Gray, M.D., illustrated by figures and analyses from nature, by Isaac Sprague, &c., 300.—Manual of Mineralogy, including Observations on Mines, Rocks, Reduction of Ores, and the application of the Science to the Arts, with 260 illustrations; designed for the use of Schools and Colleges, by James D. Dana, A.M., &c.: The British Desmidieæ, by John Ralfs, M.R.C.S, &c., with drawings by Edward Jenner, A.L.S., 302.—The Patent Office Report for the year 1847, 303.

List of works, 303.

NUMBER XVIII.

Page.

Art. XXVIII. Explanations and Illustrations of the plan of the Smithsonian Institution; by Prof. Joseph Henry, - - 305

XXIX. On a New empirical Formula for ascertaining the Tension of Vapor of Water at any Temperature; by J. H. Alexander, Esq., - - - - - - - - - 317

XXX. Considerations on the Divisibility of Magnitude; by Alexander MacWhorter, - - - - - - - - 329

XXXI. Researches on Salts; by C. Gerhardt, - - - - 337

XXXII. Observations on Rammelsberg's Analysis of the Juvenas Meteoric Stone, and on the Conclusion of Fischer's Examination of the Braunau Meteoric Iron; by Charles Upham Shepard, M.D., - - - - - - - - - - 346

XXXIII. Contributions to the Mycology of North America; by M. A. Curtis, - - - - - - - - - - 349

XXXIV. Geology of South Alabama; by C. S. Hale, - - 354

XXXV. On the Oxydation of Uric Acid by means of Potassa and Ferridcyanid of Potassium; by Adolph Schlieper, - - 363

XXXVI. New Mexico and California, - - - - - - 376

XXXVII. Notice of the Meeting of the American Association for the Promotion of Science, held at Philadelphia, September 20–25, 1848, - - - - - - - - - - 393

XXXVIII. Report on Meteorites; by Charles U. Shepard, M.D., 402

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On Nocturnal Radiation, &c., by M. Melloni, 418.—On the Composition of the Organic Alkalies, by M. Aug. Laurent: Researches on the Chemical Constitution of Asparagine and Aspartic Acid, by M. R. Piria, 420.—On the presence of Copper in the Bodies of Animals, by M. Deschamps: On the presence of Arsenic in certain Chalybeate Waters, by M. Audouard: On a new method of analysis of Inorganic matter in Blood; and on the constant presence of several metals in this fluid, by M. E. Millon: New mode of estimating the Sulphur in Organic Substances, by H. Weidenbusch, 422.—Preparation of pure Barytic Water and Salts of Baryta, by H. Wackenroder: On the Fusion of Rocks, by A. Delesse: On a new Process for covering different Metals with Brass or Bronze, 423.—New Property of Coke, by James Nasmyth, 424.

Mineralogy and Geology.—New Locality of Idocrase, Anorthite? and Molybdenite, by Prof. J. H. Webster: Lapis Lazuli and Mica: Mica originating from Hornblende, 425.—Meteoric Iron of Seelasgen in Brandenburg: Carbonate of Copper and Zinc, by Prof. A. Connell: On the Occurrence of Ores of Mercury in the Coal Formation of Saarbrück, by Herr Von Dechen, 426.—Notes on the Mines of a portion of the State of Mexico, by Lieut. G. W. Raines, U.S.N., 427.

Zoology.—On the Structure of the Jaws and Teeth of the Iguanodon, by Dr. Mantell, 429.—Notice of fragments of Trilobites of gigantic size in the Cabinet of Dr. Julius S. Taylor, Carrollton, Montgomery County, Ohio: Water Tubes in Fishes, 431.—Structure of the Foot in Embryo-Birds, 432.—American and European Oyster-catcher: Dr. M. Barry's Physiological Discoveries, 433.

Astronomy.—Observations during the Lunar Eclipse, September 12, 1848, by Lewis M. Rutherford, 435.—Eighth Satellite of Saturn: New Comet: Elements of the orbit of the planet Hebe, 437.—Elements of the planet Metis: Speculations on the next planet beyond Neptune, by M. Babinet, 438.—Shooting Stars of August 10, 1848, 439.

Miscellaneous Intelligence.—Electricity as applied to Telegraphic Purposes, 439.—The Dead Sea Expedition, 441.—On a remarkable Slide of a Rock in Fairfield District, S. C., 443.—Contributions to the Mycology of North America, 444.—Yield of lead in Great Britain: British Association, 445.—Lithorceramic: Kumptolite: Dip of Magnetic Needle: Arctic Expedition in search of Sir John Franklin: Lithographic Limestone: Ray Society: Museum of Economic Geology, England, 446.—Interesting Collections for sale, 447.—*Obituary.*—Berzelius, 448.

Bibliography.—Rare and Remarkable Animals of Scotland, represented from living subjects, with practical observations on their nature, by Sir John Graham Dalyell, 452.—Recherches sur les Animaux Fossiles; par L. de Koninck, 454.

List of Works, 455.

Correction.—Vol. v, ii ser., p. 37, line 12 from bottom, after "times," insert "less than."

P. 403, line 5 from bottom, for *quantitative* read *qualitative*.
